APPROACH NOTE

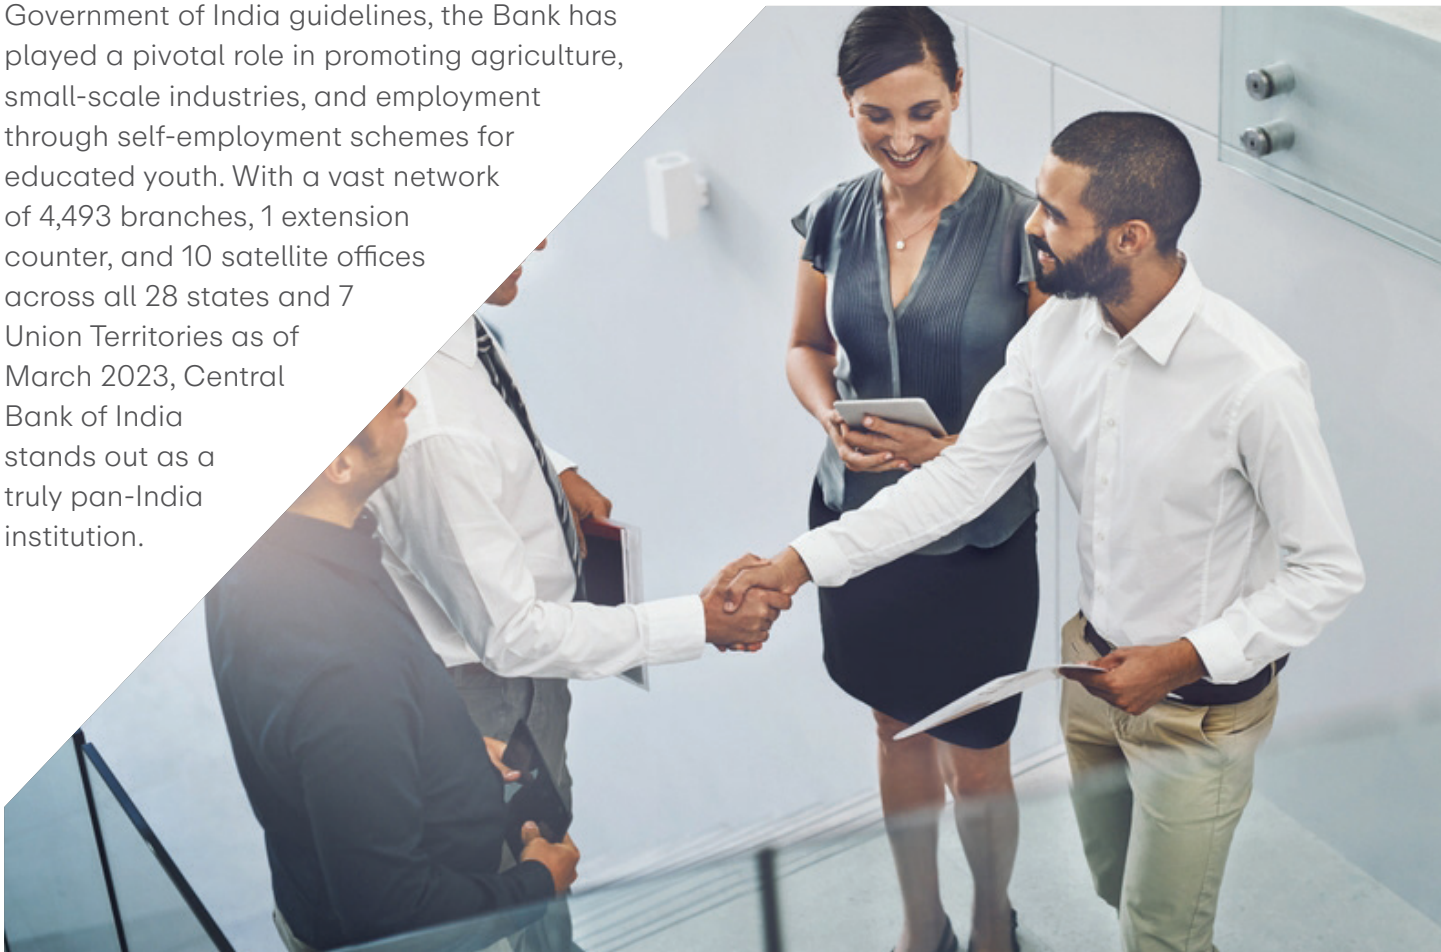

# *About* Central Bank of India

Established in 1911, Central Bank of India holds the distinction of being the first Indian commercial bank wholly owned and managed by Indians. It was the visionary dream of its founder, Sir Sorabji Pochkhanawala, and led by its first Chairman, Sir Pherozesha Mehta, as a truly 'Swadeshi Bank.' Sir Sorabji Pochkhanawala proudly described the Bank as the ***"property of the nation and the country's asset,"*** emphasizing its role as a people-centric institution thriving on public trust.

Over its 109-year history, the Central Bank of India has overcome numerous challenges, transforming threats into opportunities and excelling in the banking industry. The Bank introduced many pioneering services, including the Home Savings Safe Deposit Scheme (1921), an Exclusive Ladies Department (1924), and Safe Deposit Locker facilities (1926). It was also a trailblazer in launching innovative schemes such as Deposit Insurance Benefit (1932) and Recurring Deposit (1962). Post-nationalization in 1969, the Bank continued its legacy of innovation with offerings like Merchant Banking (1976), credit cards through Central Card (1980), and Quick Cheque Collection Service (1994).

Aligned with Reserve Bank of India and Government of India guidelines, the Bank has played a pivotal role in promoting agriculture, small-scale industries, and employment through self-employment schemes for educated youth. With a vast network of 4,493 branches, 1 extension counter, and 10 satellite offices across all 28 states and 7 Union Territories as of March 2023, Central Bank of India stands out as a truly pan-India institution.

The confidence of its customers, including prominent corporate clients such as ICICI, IDBI, UTI, LIC, and HDFC, underscores its reputation for delivering wide-ranging and trusted banking services. The Central Bank of India remains committed to innovation, resilience, and serving as the people's bank for generations to come.

# *Our Understanding of* Your Needs

We understand that the Central Bank is committed to strengthening the leadership and execution capabilities of its Branch Heads (up to Scale IV) to drive branch performance and align with the Bank's strategic vision. Based on the success of your recent pilot program, ***"Execution Excellence through Character Building,"*** there is a clear need to scale this initiative to a pan-India level, ensuring uniform access and impactful delivery across all regional office locations.

The pilot program's focus on fostering core attributes such as proactivity, discipline, & determination through practical learning methodologies-simulation exercises, case discussions, role-playing, & action planning-has demonstrated its effectiveness. With an impressive feedback score of 3.80 out of 4.00 & participants appreciating its practical and relevant approach, the program has proven to be an essential intervention for empowering your Branch Heads.

In light of the competent authority's approval for a nationwide rollout, the Central Bank recognizes the need for a trusted partner to deliver this program effectively. This includes the development of a comprehensive curriculum, tailored training schedules, logistical coordination across locations, and cost-effective implementation. Addressing this need will ensure that Branch Heads across the Bank are equipped with the skills and tools to achieve execution excellence and contribute significantly to the organization's growth objectives.

Having said that, the proposed solution by us shall address this identified need by equipping Branch Heads with actionable tools, enhanced self-awareness, & leadership attributes necessary for achieving execution excellence, cultivating character-driven leadership, and delivering superior branch performance.

*Overview*

# Execution Excellence Through Character Building

Execution Excellence refers to the ability to consistently achieve desired outcomes through meticulous planning, disciplined action, and effective leadership. It involves bridging the gap between strategy and results, ensuring that goals are not only set but also achieved with precision and impact. Execution excellence goes beyond mere task completion; it encompasses aligning resources, managing time effectively, overcoming obstacles, and maintaining a focus on high standards. At its core, execution excellence demands a proactive approach, where leaders anticipate challenges and respond with clarity and decisiveness. It integrates systems, processes, and people to deliver results that are sustainable and meaningful. Ultimately, it is the art and science of turning vision into reality while upholding values, fostering collaboration, and driving continuous improvement.

Execution Excellence through Character Building is a transformative approach to leadership and organizational success. It emphasizes the foundational role of personal character in driving high performance and achieving sustained results. While skills, strategies, and operational frameworks are essential for execution, the bedrock of true excellence lies in the integrity, discipline, and resilience of the individual leading the process. This concept bridges the gap between character ethics and execution frameworks, highlighting that effective leadership is not just about personality or quick-fix solutions but about deeply rooted values that guide decisions and actions, especially under pressure.

Character forms the foundation of execution excellence, ensuring that leadership is rooted in values that drive sustainable success. Character-driven leaders focus on creating long-term impact, going beyond short-term achievements to establish results that endure over time. Integrity and honesty, as core components of character, build trust and credibility within teams and with stakeholders, fostering smoother implementation of strategies. Moreover, leaders with strong character embrace adaptability and growth, remaining open to learning and evolving, which ensures continuous improvement in execution capabilities.

# Core Principles of Character Building for Execution Excellence

## Proactivity over Reactivity:

Leaders with a strong character demonstrate proactivity by taking initiative and staying focused on goals, irrespective of challenges. They prioritize response over reaction, creating stability and reliability within their teams.

## Discipline in Action:

Execution excellence requires a disciplined approach to planning and implementation. A strong character ensures consistency in effort, adherence to processes, and commitment to deliverables, even when immediate results are not visible.

## Resilience in Adversity:

Building character fosters resilience, enabling leaders to navigate uncertainty, overcome resistance, and stay steadfast in their vision. Character-driven leaders inspire confidence and perseverance in their teams during times of difficulty.

Frameworks such as the Roots and Fruits Analogy highlight that while personality is visible and adaptable, character serves as the unshakable roots that sustain performance even in adversity. Tools like the Value Pyramid and the Beckhard Formula for Change further reinforce the importance of aligning actions with core values and overcoming resistance through clarity of vision and actionable steps. By cultivating character, leaders create consistency in leadership, enhance decision-making, empower their teams, and achieve sustainable success that is both meaningful and impactful.

"My Coach has the ability to quickly empower his Coachee, taking them to the heart of what could be holding them back and creating a solution-focussed environment. While he is insightful, sensitive and smart, he is able to truly create magic through his ability to ask powerful questions that eventually lead to more clarity & speed of execution. The fact that he encourages you not to be afraid to fail... just keep failing better... is extremely empowering. Always grateful for this association. Power on "Mr Coach"!"

Gaurav Arora (GRV) is one of the most motivated and focused people I have ever met. His goals are lofty, by most standards, and his passion and commitment match. He surrounds himself with success, being vulnerable and open to receive feedback, explore unknown territories, go outside of his comfort zone and keep moving in the direction of his dreams. If you want a coach or a leader, seek GRV to support your momentum.
**– Master Certified Coach and Global Director @ a Leading Educational Institute**

"My coach is a great example of how one can 'design' a career for him/herself while remaining within the organization. He was Head of Pre-Sales but wanted to create a new career for himself in the area of coaching. He 'sold' his idea to our CEO about creating a coaching platform for our senior leadership. He worked with the leadership members, internal coaches, external coaches and worked out a business case about providing one executive coach for each senior manager. It was an amazing exercise that he managed single handedly. Kudos to him. This also is an example of how the community at large benefits when one person creates a career he loves."
**– VP - Human Resources @ a Leading Technology organization**
